

REWARDS

NOT YET IMPLEMENTED!

ENCOUNTER SCALING

(NOTE: These values haven't been extensively tested and may result in a much easier or much more difficult encounter).

For each player beyond 4:

- +110 Golgothon Health
- +2 Welcoming Dead Health
- All scalable DAMAGE scaled **UP** by 1 step (this stacks with Unquenched and affects Death's Grasp, Grave Smash, Carrion Spew and Welcoming Arms)

For each player below 3:

- -110 Golgothon Health
- -2 Welcoming Dead Health
- All scalable DAMAGE scaled **DOWN** by 1 step (this stacks with Unquenched and affects Death's Grasp, Grave Smash, Carrion Spew and Welcoming Arms)

For training mode:

- Scale the encounter down as though there were 2 less players.

Example: For a 4-player game:

- -220 Golgothon Health
- -4 Welcoming Dead Health
- All scalable DAMAGE scaled DOWN by 2 steps (this stacks with Unquenched and affects Death's Grasp, Grave Smash, Carrion Spew and Welcoming Arms)
- Golgothon spawns only 2 **Welcoming Dead** minions at a time

Encounter Script: GOLGOTHON THE RESTLESS

Golgothon is necrotic construct that could perhaps best be described as a "graveyard elemental." It's precise origins are unknown. The Savants theorize that it is an amalgam of displaced souls that was drawn to a graveyard that was already a locus for soul energy. Longing for a form, these lost souls gave rise to the a monster of earth and stone, infused with negative energy.

ENCOUNTER OVERVIEW

Golgothon the Restless is a **beginner** level encounter for Boss Fight: Tactics Arena. It is tuned to be a good challenge for players who are new to the game.

This encounter pits the players against a "graveyard elemental" and its zombie minions. The primary challenges for the players are:

- the **Death's Grasp / Death's Caress** combo. **Death's Grasp** pulls the players to Golgothon, while **Death's Caress** (which is always cast the following turn) causes extreme damage to players who remain close. This would be a simple challenge, except...
- the **Welcoming Dead** minions spawned by Golgothon limit player movement, forcing the players to deal with the minions or risk being trapped within reach of **Death's Caress**. The minions themselves start as a minor threat, but...
- due to **Unquenched**, the battle increases in difficulty as it wears on. If the players are unable to defeat Golgothon, they will fall to the ever-growing horde of increasingly fast and deadly minions.

COMPONENTS NEEDED

This encounter uses following components (in addition to any components used for player-controlled units):

- 25 map tiles
- 30 minion tokens
- 2 daze debuff tokens
- targeting deck
- scrap paper

VII > Minions Act EVERY Turn

WELCOMING DEAD

Minion

• Health: 8

Minion Subscript:

• Starting with the Welcoming Dead minion nearest to the northwest corner of the battlefield, each one uses **Welcoming Arms**.

Welcoming Arms

Attack •
Melee

Move 0(±1) squares toward the nearest foe. Then, strike a random foe in melee range for 2(±1).

Restless

Triggered

When a Welcoming Dead minion is slain, place a **Restless Dead** marker on its square.

Drag You Down

Innate

While at least 2 Welcoming Dead minions are adjacent to a player, that player may not take move actions or use move, shift or fly effects.

The Welcoming Dead

The Welcoming Dead minions that Golgothon summons in step VI play a vital role in this encounter. They primarily act as an obstacle, blocking players' movement around the field - both by just taking up space and thanks to their innate **Drag You Down** skill. While easy to kill or avoid, these minions respawn - and get faster and more deadly - each time that Golgothon uses **Unquenched**. Don't forget to replace slain minions with **Restless Dead** markers.

Read the following when **Drag You Down** prevents movement:

The undead surrounding you grip you tightly, blocking your movement.

NOTES & TIPS: Welcoming Dead Minions

- >> These minions do move when using **Welcoming Arms** until Golgothon has at least 1 **Unquenched** stack.
- >> **Drag You Down** does not prevent teleporting or swapping. It also doesn't prevent any other effects of a skill that generates move, shift or fly.
- >> Rather than use a separate marker for **Restless Dead** markers, simply flip the token over.
- >> **Restless Dead** markers do not occupy their squares and can be moved through freely.
- >> If **Unquenched** causes a minion to respawn in an occupied square, it is immediately moved to the nearest unoccupied square.

PHASE IV: END PHASE

There are no encounter actions during this phase. Once the players have completed any end-of-turn triggered effects, return to **Script Start** (p. 4)

IV. > Activates EVERY Turn

GRAVE SMASH

Basic • Attack •
Move • Melee

- ☞ The foe that dealt the most total damage to Golgoth on this turn.

Move 4 squares toward target. Then, if in melee range, strike target for 10(±2) damage and inflict Daze 1. Otherwise, use Carrion Spew on that foe.

Read the following when this skill is first used.

Golgoth strikes out with a massive stone fist. The impact leaves you dazed.

NOTE: If Carrion Spew replaces Grave Smash in this step, Golgoth still uses Carrion Spew in Step V (thus he will do two Carrion Spews that turn).

V. > Activates EVERY Turn

CARRION SPEW

Basic • Attack •
Range 6

- ☞ The foe with the highest health in range.

Strike the target for 6(±2) damage and force it 1 square in a random direction.

Read the following when this skill is first used.

Golgoth spews a pile of rotting carrion. The assault on your senses leaves you disoriented.

NOTE: If the force would move the unit into a wall or other unit, nothing happens.

VI. > Activates EVERY Turn

WELCOMING DEAD

Scripted • Summon
• Unlimited

- ☞ The foe furthest from Golgoth.

Golgoth summons 3 Welcoming Dead minions in the nearest unoccupied squares to target foe.

Read the following when this skill is first used.

The ground beneath your feet seems to come alive, as a trio of expressionless undead rise from the ground and wrap their decaying arms around you.

NOTES: Grave Smash

>> Damage dealt to Golgoth's minions isn't factored in when determining who it targets.

>> Golgoth always moves toward his target, even he has no chance of reaching them. Remember that he forces other units out of his way while moving.

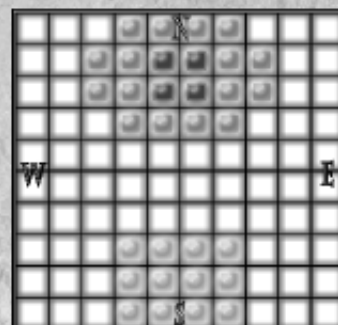

NOTES: Welcoming Dead

>> Minions prefer to spawn in squares further from Golgoth.

>> Minions may spawn on the other side of a wall from the targeted player.

ENCOUNTER SETUP

- Shuffle 25 map tiles and lay them out in 5 rows of 5 tiles each, forming a 5x5 tile battlefield (10x10 total squares).
- Determine which side of the battlefield is north.
- The starting locations for Golgoth and the player units are marked on the grid to the right:

- ☞ = default start for Golgoth
- ☞ = flex space for Golgoth
- ☞ = available starts for players

STATISTICS AND TRAITS

• **Health: 450**

(This value is tuned for a 4-player group. For information on scaling the encounter for more or less players, see p.8)

• **Resolve 2** (Debuffs do not apply to this unit until it has 2 debuffs of the same type. It clears 2 debuffs at a time.)

• **Sturdy 1** (Any forced movement against this unit is reduced by 1, to a minimum of 1.)

• **Large** (This unit takes up a 2x2 space on the map.)

• **Trample** (This unit can enter squares occupied by other units. If it does, those units are forced into the nearest open square.)

RAID BOSS TIPS

• The dark red spaces on the map grid is the preferred start space for Golgoth. If those spaces are blocked by walls or pillars, he can be shifted into an open area within the lighter red squares.

• Golgoth is a huge creature made largely of earth and stone. If players wonder why he can push them around when he moves and why their debuffs and forced movement effects aren't as effective, that's why!

• Keep in mind that forced movements always force a unit at least 1 square, even if that unit has Sturdy.

SCRIPT START!

Reminder: Return to this page at the start of each turn!

PHASE I: START OF TURN

>Read:Turns:1<

Read the following at the start of the encounter:

Before you stands a creature that can only be described as a "walking graveyard." Twenty feet of mossy rock and upturned earth, its body is adorned with shattered gravestones, cemetery lanterns and half-exhumed corpses. An aura of necrotic mist lingers around the creature. As it lurches toward you, the grass at your feet withers and dies and the whispers of lost souls fill your ears. It's hollow eyes betray no emotion, but its motives are undeniable: it exists only to extinguish life.

>Read:Turns:3-6-9<

Read the following at the start of turn 3; read only the bolded parts on turns 6, 9, etc.:

The necrotic mist surrounding Golgothon thickens, filling your lungs with a sickly-sweet scent of death. With each breath, you feel your limbs grow weaker; your will to fight fades. The mist is thinner further from the creature - **escape the epicenter before Death's Caress lulls you to a final rest.**

PHASE II: PLAYER PHASE

There are no encounter actions during this phase. Once the players have completed their actions, proceed to **Phase III: Encounter Phase**.

RAID BOSS TIP

• If players don't seem to be reacting to the warning for Death's Caress, you may wish to remind them and emphasize how deadly the attack is. If they still don't react, well, hey, you tried!

PHASE III: ENCOUNTER

I. >ActivatesTurns:2-5-8<

DEATH'S GRASP

Scripted • Attack
• Burst 6

Strike each foe in the burst for **5(±1)** damage. Starting with the foe closest to him, each foe is forced **5** squares toward Golgothon. This effect does not require line of sight.

Read the following when this skill is used (read only the bolded part on subsequent uses):

Golgothon lets loose a low, tuneful moaning sound - a beautiful and horrible lullaby. **Against your will**, you find yourself longing for the embrace of the death, and **your legs carry you closer to the monster.**

II. >ActivatesTurns:3-6-9<

DEATH'S CARESS

Scripted • Attack
• Burst 6

Each foe in the burst loses **28** health. This amount is reduced by **4** for each square between Golgothon and the target. This effect does not require line of sight.

Read the following if this skill damages one or more players.

The necrotic mist fills your lungs, sapping your life force.

NOTE: Count outward from Golgothon to the affected unit to determine distance. Units in melee range with Golgothon are technically 1 square away.

III. >ActivatesTurns:4-7-10<

UNQUENCHED

Scripted • Self
• Enrage

Gain **1 Unquenched** stack. Each stack scales the encounter up by **1** step. Then, replace each **Restless Dead** token with a **Welcoming Dead** minion. Lose **4** health for each token replaced.

Read the following when this skill is used.

Golgothon roars, his hunger for more life energy fueling his fury. Animating energy flows out from the creature, weakening it - but **the zombies you had defeated rise again** with renewed fervor.

NOTES: Death's Grasp

- >> If a unit can't get closer to Golgothon because of a wall, the forced movement ends.
- >> Units can be pulled through friendly units. If a unit ends the force in an occupied square, it is moved to the nearest unoccupied square.
- >> Units take damage even if they aren't forced.

NOTE: Unquenched

- >> Numbers that scale with Unquenched stacks are indicated by a (±n) after the base value.
