

Kindleborne Tips

- Generating Heat is tied to actions. Movement actions and free actions count, so use that to your advantage.
 - Converting Heat to damage with **Tinderbolt** more efficient than converting it to healing with **Dissipation**... but dead men deal no damage.
 - **Pyromania** can be devastating, but you need to plan your turn around it. Plan it right and you can play 7 Tinderbolts - and the damage adds up fast.
 - To get the most from **Cauterizing Brand**, boost the damage you deal to yourself with a  card.
 - If you play it right, **Flickerstep** will recharge quickly, allowing you to play a little recklessly.
 - **Ash Augur** doesn't look like much on the surface, but it can be key to your strongest combos. Don't be afraid to "waste" **Embershield** or **Wave of Cinder** to trigger its free clause.
