

Soulweaver Tips

- Choose your Tether - and who you tether to - based on the situation. **Potent Soul** and **Stalwart Soul** are useless without the right (S) cards in one or both of your hands.
- **Entwined Soul** is best used when you or an ally really need to activate a certain Heroic.
- **Soul Echo's** bonus effect triggers from any kind of bonus damage - whether its from **Potent Soul**, weaving  cards or something else.
- **Essence Shift** can seem limiting, but the fact that it has effectively unlimited range makes it extremely powerful.
- Your hand of  cards is very important. Use **Well of Souls** early and often to keep it full.

Rules Notes

- The total bonus damage added to a strike can never exceed the base value of that strike. Weaving a  card adds bonus damage.
- "Tethered ally" refers to whichever ally you last chose with **Fates Intertwined**. An ally remains tethered until you choose a new ally to Tether to.
- You cannot change Tethers without also changing allies, but you can choose the same Tether you last chose when you choose a new ally.
- **Potent Soul** and **Stalwart Soul** count the total number of cards in both yours and your Tethered ally's hands.
- You cannot "steal" an ally's cards with **Entwined Soul**. The ally must agree to the trade.
- If multiple shields are stacked, the shields are used up in whatever order the unit being struck chooses. (This may be relevant to **Strength in Unity / Unbreakable Union**).

Starter Guide: SOULWEAVER

You are the **Soulweaver**, Anima Incarnate. Long ago, your soul was touched by the pure essence that binds the universe. Across the course of history, your soul has left a legacy of legendary leaders, diviners and wise men and soothsayers in its wake.

Empowered by this affinity, you have the power to forge intense and absolute connections with your allies. This goes beyond leadership and camaraderie - this mystical connection carries real power for you and those you are bound to.

Many underestimate you, but any tactician worthy of his rank know that behind every successful Ascendant combat unit is a skilled Soulweaver.

Role: Battlefield control spellcaster
Core Mechanic: Tethering to Allies
Play Difficulty: Medium
